

GCL Pack Offer for Employers

Dear Employer,

We have noticed that you have open competition for a new commercial position in your organisation, and we believe that our offer will help you a lot and will be of immense use:

Rationale:

We are witnessing the fantastic development of the global economy, which is the reason why special attention needs to be paid to the selection of personnel, to “the values of candidates that are not subject to direct competition” and their international business opportunities, culture and capability of rapid and self-solving tasks in addition to the modern demands of the profession and the type of job.

The European Chamber of Commerce and more than 150 experts from around the world, have carefully selected topics, and created a unique testing system that will allow you to easily identify the above mentioned capabilities of potential candidates. For four years a system called **GCL - Global Commerce Licenses**, officially recognized by the European Union and the US-European Accredited Council for Adult, makes a strong and widely accepted mainstay of many worldwide companies and today you can get it in your own country.

GCL pack (e-Index code for 12 online tests) will cost you only **EUR 5.00** or **USD 7.00** per candidate and will give you:

- A complete online check-up of their abilities, without any commitment on your part
- A significant shortening of the selection procedure for personnel.

And even more: when you need to check your existing employees with clear identifications of their affinities!

It is no longer necessary to organize the supervision of candidates while taking GCL exam. They can test themselves anywhere, even from home.

Procedure:

- When you give the **GCL e-Index code** to the candidate, they will be able to access online GCL testing through website www.gcl.nu. The test consists of 4 modules: knowledge of information technology, business ethics, the general economy, and the legal elements of the business. Test questions are general knowledge useful for all types of professions, and testing procedure is effective and fast, based on multiple answers. Test questions are in English with automatic Google translation (which requires a logical control of those who do not know enough English language).

- Each test is randomly generated at the moment of deposit of the candidate's approach, to prevent any prior preparation for rewriting. Candidates are allowed in the 45-minute duration of the each single test, to use resources to search for answers on the internet or their literature, to work independently or consult with others and show that not only they have the existing knowledge, but also their readiness to quickly find answers to questions and tasks that previously were not known. It is certainly a secure foundation for future quality work in your organisation or company.

- With a total of 12 attempts, with an average of 3 times per module, the candidate has ability to take each of the four GCL module and get the results of testing with an overview of correct answers ... so you do not need any further discussion or clarification from your side.

Follow up and controls:

- On the website www.gcl.nu there is a "CHECK CERTIFICATE" button. By entering the GCL e-index code which you have given to the candidate, you can get statistics and insight into the database of answers. This will give you a complete picture of each candidate and given their testing process didn't withhold; this picture will always be 100% accurate!

Online automated selection of candidates for the job has been known for a long time in the HR systems as a very useful tool to reduce the time consumption and participation in interviewing. However GCL model with its contemporary global orientation, proved to be a very useful tool for efficient verification of those who are already employed in the company! Check and make the most of these opportunities!

Confident that you will become one of thousands of satisfied customers of GCL system, we are ready to provide you with 5 (five) free packages for your verification and confirmation.

We await your response and wish you success in your future work.

With best regards
GCL Egypt Inc. Team
